

CHAPTER 5

GREEN SKILLS - II

INFORMATION TECHNOLOGY (402)
ARTIFICIAL INTELLIGENCE (417)

L - 2

QUESTIONS

[QUESTION] To save water as a resources which techniques must be adopted?

- (a) Rainwater Harvesting
- (b) Sprinkler Irrigation
- (c) Recycling of Waste
- (d) Both (a) and (b)

[QUESTION] Energy demand is developing countries will increase to times the current levels by 2030.

- (a) four
- (b) five
- (c) six
- (d) eight

QUESTIONS

[QUESTION] The biggest problem related to sustainable development is

- (a) to safeguard forests
- (b) to safeguard fisheries
- (c) to safeguard croplands
- (d) All of the above

[QUESTION] If sustainable development is neglected then

- (a) we shall have a safe and secure environment.
- (b) it will destroy ecology and environment endangering the survival of future generation.
- (c) mankind will continue to live and prosper.
- (d) All of the above

QUESTIONS

[QUESTION] Sustainable forest management which were development in Europe during the

- (a) 16 th and 17th
- (b) 17th and 18th
- (c) 18th and 19th
- (d) 19th and 20th

[QUESTION] Sustainable development requires the judicious use of

- (a) natural resources
- (b) human resources
- (c) man - made resources
- (d) none of the above

QUESTIONS

[QUESTION] Sustainable development is necessary because

- (a) it helps to promote and conserve the environment
- (b) it aware the people for effective use of natural resources
- (c) it aims at achieving the goal of economic and social development
- (d) all of the above

QUESTIONS

[QUESTION] of natural resources with growing economic activities will continue to pose serious challenges to environment.

[QUESTION] The overall effects of economic activities on the environment are continuously

[QUESTION] The ecology can be protected through imposition of and

[QUESTION] Proper balance ought to be maintained between..... and for the achievement of sustainable goals.

[QUESTION] The government should make policies against....., activities.

QUESTIONS

[QUESTION] Poor management of natural resources with growing economic activities will continue to pose serious challenges to environment.

[QUESTION] The overall effects of economic activities on the environment are continuously changing.

[QUESTION] The ecology can be protected through imposition of deforestation and afforestation.

[QUESTION] Proper balance ought to be maintained between taxes and fine for the achievement of sustainable goals.

[QUESTION] The government should make policies against illegal activities.

QUESTIONS

[QUESTION] Sustainable development is the organising principle for meeting human development goals. **[TRUE/FALSE]**

[QUESTION] Sustainable development is not necessary for the maintenance of the environment. **[TRUE/FALSE]**

[QUESTION] Poor management of resources is a serious challenge to the environment. **[TRUE/FALSE]**

[QUESTION] Government should make policies against illegal activities. **[TRUE/FALSE]**

[QUESTION] Rainwater harvesting techniques are not useful at all. **[TRUE/FALSE]**

QUESTIONS

[QUESTION] Sustainable development is the organising principle for meeting human development goals. **[TRUE]**

[QUESTION] Sustainable development is not necessary for the maintenance of the environment. **[FALSE]**

[QUESTION] Poor management of resources is a serious challenge to the environment.
[TRUE]

[QUESTION] Government should make policies against illegal activities. **[TRUE]**

[QUESTION] Rainwater harvesting techniques are not useful at all. **[FALSE]**

QUESTIONS

[QUESTION] Give the definition of sustainable development as suggested by Brundtland Report.

[ANSWER] Sustainable development is development that meets the needs of the present, without compromising the ability of future generation to meet their needs.

[QUESTION] Write any two challenges to sustainable development.

[ANSWER] The two challenges to sustainable development are:

- (i) Rise in population level would lead to severe environmental degradation in the future.
- ii) Poor management of natural resources combined with growing economic activities will continue to pose serious challenges to environment.

QUESTIONS

[QUESTION] Give any one practice/sustainable process that is being used to help preserve the environment. [CBSE SQP TERM - II]

[ANSWER] One practice/sustainable process that is being used to help preserve the environment is organic farming. Organic farming is an agricultural system that uses fertilisers of organic origin such as compost manure, green manure and bone meal and places emphasis on techniques such as crop rotation and companion planting.

[QUESTION] Give an example of large scale production of solar power in India.

[CBSE SQP TERM - II]

[ANSWER] Charanka-Gujarat Solar Park is an example of large scale production of solar power in India.

QUESTIONS

[QUESTION] The achievement of sustainable development requires what?

[ANSWER] The achievement of sustainable development requires the integration of economic, environmental and social components at all levels.

[QUESTION] 'Reduced Inequalities' is one of the sustainable development goals set by the UN. Give any two ways to reduce inequalities. [CBSE SQP TERM - II]
