

Class 10th Social Science

WPP-5 Solutions

**Forest and Wildlife
Resources
Geography**

WPP (Weekly Practice Paper) - 5

Made by Digraj Singh Rajput

CLASS X

SOCIAL SCIENCE - GEOGRAPHY

CHAPTER - FOREST AND WILDLIFE RESOURCES

Time Allowed: 1 Hours

Maximum Marks: 30

General Instructions:

This question paper is divided into four sections-Section A, B, C and D.

All questions are compulsory.

Section-A: Question no. 1 to 5 are objective type questions of 1 marks each.

Section-B: Question no. 6 to 8 are defined type questions, carrying 2 marks each. Answer to each question should not exceed 40 words.

Section-C: Question no. 9 to 11 are Short answer type questions, carrying 3 marks each. The answer to each question should not exceed 80 words.

Section-D: Question no. 12 and 13 are Long answer type questions, carrying 5 marks each. Answer to each question should not exceed 120 words.

All the best!!

SECTION-A

Objective Type Questions

1 X 5 = 5

1. Which of the following statements about the Indian Wildlife (Protection) Act of 1972 is correct?

- (a) It focused mainly on promoting hunting practices for tribal communities.
- (b) It was implemented to allow trade in endangered species under government supervision.
- (c) It aimed to protect endangered species by banning hunting and giving legal protection to habitats.
- (d) It replaced all national parks with private conservation reserves.

2. Which Indian state has the largest area under permanent forests?

- A. Odisha
- B. Uttar Pradesh
- C. Madhya Pradesh
- D. Punjab

3. The Mundas and Santhals of Chota Nagpur region worship which among the following trees?

- A. Mahua
- B. Mango
- C. Banana
- D. Peepal

4. Where is the Sariska Tiger Reserve located?

- A. Gujarat
- B. Rajasthan
- C. MP
- D. UP

5. Forest lands are protected from any further depletion in which categories.

- A. Reserved forest
- B. Village forest
- C. Protected forest
- D. Unclassed forest

SECTION-B

Define Type Questions

2 X 3 = 6

Write a short note on:

6. Sacred groves

7. Indian Wildlife Protection Act 1972

8. Reserved forest

SECTION-C

Short Type Questions

3 X 3 = 9

9. What was the objective behind the Joint Forest Management program? Who were the stakeholders?

10. What is 'Project Tiger' ? Why was it started, and what are its benefits?

11. Explain the importance of Forest and Wildlife in our life?

SECTION-D

Long Type Questions

5 X 2 = 10

12. What are the various steps taken by the government to protect and conserve the depleting flora and fauna? Explain.

13. Conservation Strategies are not new in our country. Different communities are performing it in different ways? Explain with examples.

SECTION-A Objective Type Questions

1. Which of the following statements about the Indian Wildlife (Protection) Act of 1972 is correct?

- (a) It focused mainly on promoting hunting practices for tribal communities.
- (b) It was implemented to allow trade in endangered species under government supervision.
- (c) It aimed to protect endangered species by banning hunting and giving legal protection to habitats.
- (d) It replaced all national parks with private conservation reserves.

Ans.(c) It aimed to protect endangered species by banning hunting and giving legal protection to habitats.

SECTION-A Objective Type Questions

2. Which Indian state has the largest area under permanent forests?

- A. Odisha
- B. Uttar Pradesh
- C. Madhya Pradesh
- D. Punjab

Ans. C. Madhya Pradesh

SECTION-A Objective Type Questions

3. The Mundas and Santhals of Chota Nagpur region worship which among the following trees?

- A. Mahua
- B. Mango
- C. Banana
- D. Peepal

Ans. A. Mahua

SECTION-A Objective Type Questions

4. Where is the Sariska Tiger Reserve located?

- A. Gujarat
- B. Rajasthan
- C. MP
- D. UP

Ans. B. Rajasthan

SECTION-A Objective Type Questions

5. Forest lands are protected from any further depletion in which categories.

- A. Reserved forest
- B. Village forest
- C. Protected forest
- D. Unclassed forest

Ans. C. Protected forest

SECTION-B Define Type Questions

Write a short note on:

6. Sacred groves

Ans. Sacred groves are forests or groups of trees protected by local communities because they are considered sacred and associated with gods and goddesses.

They are rich in vegetation and help conserve nature; examples include the Mahua and Kadamba groves of the Mundas and Santhals in Chota Nagpur, and the Tamarind and Mango groves worshipped by tribals in Odisha and Bihar.

SECTION-B Define Type Questions

Write a short note on:

7. Indian Wildlife Protection Act 1972

Ans. In the 1960s and 1970s, conservationists demanded a national wildlife protection programme so the government of India implemented the Wild Life Protection Act in 1972.

- Act provides various provisions for protecting listed species of animals, birds, and plants and establishment of a network of ecologically-important protected areas in the country.
- Protecting, banning hunting and giving legal protection to endangered species ,their habitats and restricting trade in wildlife.

SECTION-B Define Type Questions

Write a short note on:

8. Reserved forest

Ans. These are the forests, which enjoy legal protection, owned or managed by the government through the Forest Department .More than half of the total forest land has been declared reserved forests.

Reserved forests are regarded as the most valuable as far as the conservation of forest and wildlife resources are concerned.

SECTION-C Short Type Questions

9. What was the objective behind the Joint Forest Management program?

Who were the stakeholders?

Ans. Joint Forest Management was introduced by the Government of India in the 1980s which aimed at the combined effort of the forest department and the local people to manage and protect the forests.

The objective behind the Joint Forest Management Program is :

- I. To protect biodiversity in a sustainable manner.
- II. Local communities to be involved in some kind of natural resource management and placed them at the centre-stage in decision-making,
- III. To improve the lifestyle of the local people by allowing them to benefit from forest products like medicines, fruits, gum, rubber etc.

The stakeholders include the local community, the Government of Forest Department, industries and wildlife enthusiasts.

SECTION-C Short Type Questions

10. What is 'Project Tiger' ? Why it was started, and what are its benefits?

Ans.

- Project Tiger is a tiger conservation program launched by the Indian Government in 1973 to save tigers.
- It was started because, In 1973 the tiger population had dwindled to 1,827 from an estimated 55,000 at the turn of the century. This happened because of Increase in activities such as poaching for trade, shrinking habitat, depletion of prey base species, growing human population, etc. left the tiger population on the verge of extinction.

Benefits of Project Tiger:

- I. It successfully stabilized and increased the tiger population in designated reserves, protecting them from threats such as poaching and habitat loss.
- II. Tigers are apex predators and play a crucial role in maintaining ecological balance. Protecting tiger habitats indirectly supports the health of entire ecosystems.

SECTION-C Short Type Questions

11. Explain the importance of Forest and Wildlife in our life?

Ans. Forests and wildlife play crucial roles in our lives in numerous ways:

- I. Forests and wildlife are vital for maintaining biodiversity. They provide habitats for a wide variety of plants, animals, and microorganisms, thereby preserving genetic diversity essential for ecosystem resilience.
- II. Forests act as carbon sinks, absorbing carbon dioxide from the atmosphere and helping mitigate climate change. They also influence local and regional climates by regulating temperatures, precipitation patterns, and humidity levels.
- III. Forests and wildlife contribute to economies through industries like timber, pharmaceuticals, ecotourism, and agriculture. They provide livelihoods for millions of people worldwide, particularly in rural areas.
- IV. Any other specific/ relevant point.

SECTION-D Long Type Questions

12. What are the various steps taken by the government to protect and conserve the depleting flora and fauna? Explain.

Ans. The following steps are taken by the government to protect the flora and fauna of the country.

- I. Government of India implemented the Wild Life Protection Act in 1972. Act provides various provisions for protecting listed species of animals, birds, and plants and establishment of a network of ecologically-important protected areas in the country.
- II. Central and many state governments established National park and wildlife sanctuaries.
- III. Several projects were started by the central government. Project Tiger was launched by the Indian Government in 1973 to save tigers.
- IV. Now the conservation projects are focusing more on bio diversity rather than only a few species.
- V. Classified forest under different categories like Reserved forests, Protected forests, Unclassed forests.

SECTION-D Long Type Questions

13. Conservation Strategies are not new in our country. Different communities are performing it in different ways? Explain with examples.

Ans. Conservation strategies in various forms have been practised by different communities in different ways. Different communities often adopt unique approaches to protect and preserve their local environments and needs.

- In **Sariska wildlife sanctuary, Rajasthan**, villagers have fought against mining by citing the Wildlife Protection Act.
- **Alwar district of Rajasthan** have declared 1,200 hectares of forest as the **Bhairodev Dakav Sonchuri**.
- Communities in rural areas launch their own conservation programmes and movements and manage collectively to sustainably use resources.

Example, The **famous Chipko movement** in the Himalayas.

- Farmers and citizens groups like the **Beej Bachao Andolan in Tehri** and Navdanya have shown that adequate levels of diversified crop production without the use of synthetic chemicals are possible and economically viable.
- **Joint Forest Management programme**, which aimed formation of local (village) institution to manage and protect the forests.
